

I.T. SERVICES SOLUTIONS

GAMING

***MVS proposes itself to operators belonging to the world of GAMING as the sole interlocutor in the management of the life cycle of devices in use at the Casinos and Gaming Halls, through the use of proprietary assets***

## Benefits for the customer

- single interlocutor for a broad variety of logistic and technical services;
- process optimization and cost reduction;
- strong integration with existing customer infrastructures (business expansion / geographical coverage);
- focus on own core business;
- efficiency and ease of intervention;
- high professional-technical competence;
- reduction of economic losses caused by machine downtime;

## Device Managed

- |  |  |
